📁 PROJECTS

1. Event Ticket Booking Application
Evento
- Developed a ticket booking system using **Django** and **Bootstrap 5**, featuring user and admin management, payment integration, and enhanced security with **Celery** for OTPs and automated emails.

2. Blogging - Platform
Blog-hub
Created a dynamic blog platform with Django, allowing blog creation, admin moderation, and **user messaging**, along with admin dashboards and Celery for automated tasks.

3. E-Library System with Django-Redis Caching
Implemented an E-library system with **Redis caching** for CRUD operations, reducing database load and improving performance.

4. Todo Application API Using Django REST Framework
Developed a **REST API** for managing tasks with CRUD functionality, filtering, and sorting using **Django REST Framework.**

5. E-commerce Mini Project
Built an online store with product listings, user authentication, and shopping cart functionality using **Django, MySQL, and Bootstrap.**
